

all the buildings

all the buildings that were upright are upside down now
the penthouse is now the basement and the other way round
all the people that were up tight
and all the people that were up high
they're all underground.

people are small and tall buildings fall

all the people that were uptight are inside out now
the best houses are the places with windows all around
all the buildings that were upright
and all the buildings that were up high
they're all underground

so keep, both feet on the ground
don't let, your head get stuck in the clouds

people are small and tall buildings fall

so keep, both feet on the ground
don't let, your head get stuck in the clouds
